

EVRS MEMBER SURVEY (EMS)

How are you getting on after our Istanbul meeting? Time flies and our next meeting in Örebro is approaching very soon. Have you prepared anything for it? If you have, well done and we wish to see you there; if not, it is still not too late to participate because your enthusiasm is always welcome.

However, have you heard of our EVRS Member Survey (EMS)? It is launched recently in our EVRS website under "Share Your Experience". This survey is led by our Secretary – Dr. Athanasios Nikolakopoulos, we were granted permission and blessing from our sister society – American Society of Retina Specialists. Dr. Manal Bouhaimed has worked all her way through of designing this new set of questionnaire, certainly her contribution to this survey is always appreciated.

Upon completing EMS online, you will receive a certificate of accreditation from EVRS. Therefore, if you are interested, please kindly visit our website and get yourself actively participating and accredited.

You may ask us at this stage what is the content of this questionnaire? We will not tell you what is it, we want you to explore and discover the mystery by yourself!! We can reassure you that your participation of this survey will benefit our future vitreoretinal surgeons. Your decision, your choice and your opinion may change the conventional way of solving certain vitreoretinal problems.

Please let yourself relax and participate, please do not mask your enthusiasm with your uncertainty and scepticism. You may witness the beginning of another new horizon.

Regards,
Dr. MS Lee
